Rosemary Oil Organic

** 100% NOP Pure and Natural, Organically certified oil. Not adulterated, not diluted, from one single plant source**

Latin Name: *Rosmarinus officinalis* – Verbenone Type

Extraction:
Steam distillation

Farming & Harvesting:
The Rosemary farm is located within South Africa and we have another farm source in Malawi. These farms are maintained under strict, NOP 100% organic certification with plants being cultivated without any pesticides or herbicides. The water source is from a clean supply.

Oil Analysis and uses: Our Rosemary is the verbenone type which has a content of Verbenone between 5%-9%. This rosemary plant type has a much lower cineol content which makes this oil much gentler and less pungent. Our Rosemary oil has higher levels of Alpha Pinene which is a natural organic component which smells like Turpentine. Research shows "the intense antimicrobial potential of eugenol, b-pinene and a-pinene which were able to inhibit significantly the growth and cell viability of potential infectious endocarditis causing gram-positive bacteria."*: The Alpha pinene in Rosemary is a terpenoid which has been found to be effective to repel lice. The 1,8 cineol component found in Rosemary oil has been known to increase blood flow, therefore it is good to use Rosemary oil in a massage blend. Rosemary oil has been recorded to have antioxidant activity. *

*Lice repellant composition - InventorMeir EiniDov Tamarkin

Oil Description & Odour Profile:
Herbaceous and fresh

Blends well with:
Chamomile, Lavender, peppermint, Eucalyptus

Safety Information:
NONTOXIC. 1.8 CINEOL CAN INCREASE BLOOD FLOW AND SHOULD BE USED WITH CAUTION. DO NOT INGEST.
